## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 6-11-02
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu as further evidenced by Velho and in view of Minifie.

Shimizu discloses that is commonly known in the art that cupuassu is a species closely related to cacao and that chocolate can be made from the seeds thereof as from cacao, as disclosed by Shimizu (see page 2, line 8 from the bottom and page 3, lines 6 to 5 from the bottom). Further evidence of the use of this product as a substitute for chocolate can be found in Velho. Velho shows the composition of the oil in cupuassu at Table 2 and describes the processing of the seed at page 3 and in Figure 5. The claims appear to differ from the Shimizu and Velho disclosure in the inclusion of other ingredients in the chocolate manufacture. Minifie, at pages 87 and 113, specifically, is relied upon to show that other ingredients are typically used in chocolate manufacture. Thus is cupuassu was used

in place of chocolate, one would expect the product to be called a chocolate substitute. The cupuassu can be termed a health food by virtue of the calories expected from the fat in the fruit. There is no specific statement in the references that suggests that the seeds are roasted, but one of ordinary skill in the art who discovers a product made like chocolate, would expect that the seeds would be roasted or heat treated in water prior to extraction because Velho teaches that heat destroys the flavor of the pulp. Thus the resulting bland oil from the seed would be more suitable for other culinary or cosmetic uses.
